EDUCATION

B.Tech in Computer Sciences and Bio Sciences

Indraprastha Institute of Information Technology, Delhi (IIITD)
2023 - 2027
CGPA - 8.15 (4 semesters)

Competitive Exam Performance

JEE Mains 2023 All India Rank: 20,565

Senior Secondary Education (XII)

CBSE Board
Percentage: 93.6%

Senior Secondary Education (X)

CBSE Board
Percentage: 96.8%

TECHNICAL SKILLS

- Programming Languages:** Java, C, C++, Python
- Web Development:** React.js, Node.js, RESTful APIs, SQL, PostgreSQL
- Tools & Technologies:** JavaFX, lib-GDX, Box2D, Streamlit, CrewAI, LangChain
- Computer Science Fundamentals:** Data Structures and Algorithms, Object-Oriented Programming (OOP), Operating Systems, Multithreading
- Machine Learning:** Supervised/Unsupervised Learning, Pattern Recognition, Bayesian Decision Theory, Discriminant Analysis (PCA, LDA, ICA), Ensemble Methods (Bagging, Boosting), Model Evaluation

CAREER OBJECTIVE

As a driven and passionate computer science graduate, I am eager to gain practical experience and develop my skills in software engineering. With a strong foundation in programming languages, data structures, and algorithms, I aim to contribute to innovative projects, learn from experienced professionals, and grow my technical and problem-solving abilities.

EXPERIENCE

Deloitte Technology Job Simulation (July,2025)

- Completed job simulation designed by Deloitte, focusing on real-world technology and software engineering scenarios.
- Developed and implemented code-based solutions to address business challenges.
- Authored a comprehensive proposal outlining the architecture and implementation plan for a data-driven dashboard.

Skills Demonstrated:

- Programming: Python, JSON, data structures & algorithms
 - Project Planning & Solution Design
 - Software Development Processes
 - Analytical thinking & problem solving
- [Certificate](#)

PROJECTS

AI-Powered Trip Planner (May 2025 – June 2025)

- Built an intelligent trip planner using CrewAI, LangChain, and Streamlit to generate customized travel itineraries based on user preferences.
- Orchestrated multiple AI agents and integrated language model operations for dynamic itinerary creation.
- GitHub: <https://github.com/Saksham355/TravelAgentAssist>

Real Estate Management System (January 2025 – May 2025)

- Developed a full-stack property management platform with React.js, Node.js, PostgreSQL, and RESTful APIs.
- Implemented features for property listings, agent tracking, and transaction processing.
- GitHub: <https://github.com/Saksham355/RealEstateHub>

Game Development (August 2024 – December 2024)

- Created an Angry Birds clone using lib-GDX and Box2D, implementing game mechanics, physics simulation, and user interactions.
- GitHub: https://github.com/Saksham355/Prograhmin_Angry_Birds

Canteen Management System (August 2024 – December 2024)

- Designed a CLI-based canteen management system in Java with JavaFX.
- GitHub: https://github.com/Saksham355/Canteen_Management_System

Course Management System (August 2024 – December 2024)

- Developed a command-line course registration system in Java.
- GitHub: https://github.com/Saksham355/Course_Registration_System

Operating Systems Implementation (August 2024 – December 2024)

- Built a custom shell implementation using system calls and fork operations
- Implemented memory virtualization using segmentation and paging techniques
- Created a multi-threaded system simulating producer-consumer scenarios
- Optimized matrix multiplication using parallel processing with threads and thread pools
- Shell: https://github.com/Saksham355/Fork-Wait-Exec-Process-Scheduling-Shell_commands
- Memory: https://github.com/Saksham355/Segmentation_Paging_IPC

Assembler and Simulator (January 2024 –May 2024)

- Designed an assembler to convert assembly code to binary and a simulator to execute instructions, demonstrating computer organization principles.
- <https://github.com/Saksham355/Thread-Scheduling-and-Synchronization>

INTERESTS & HOBBIES

- Robotics: Participated and qualified for nationals in WRO-2017 and Robocup - 2017, 2018.
